

EUGENIO KURI MUZQUIZ

PERSONAL PORTFOLIO: [HERE](#)

734-882-8767 | kurieu@umich.edu | www.linkedin.com/in/kurieu | <https://github.com/kurieu-mx>

EDUCATION

University of Michigan (Sophomore)

B.S.E. in Data Science and Applied Mathematics Minor

May 2024 – Present

- **GPA:** 3.68
- **Relevant Courses:** Data Structures and Algorithms, Multivariable and Vector Calculus, Discrete Mathematics

PROFESSIONAL EXPERIENCE

AI & LLM Intern → Full-Stack AI & LLM developer (Part-Time)

Remote

Unif-AI

May 2025 – Present

- Engineered **custom AI tools and applications** in **C++** and **Python** for **legal and accounting clients**.
- Built a **web platform** for **lawyers** to **generate and process legal documents**, and an **app** for **accountants** to **manage firm accountability**.
- Deployed **scalable solutions** using **Firebase, SQL, Pinecone, OpenAI APIs**, and **AWS**.
- Designed and **fine-tuned custom large language models (LLMs)** to improve **document processing, context handling**, and **knowledge retrieval**.

Go & Computer Vision Intern

Remote

Merlin Drones

February 2025 – Present

- Built **Go modules** on **Raspberry Pi** to run **real-time computer vision (OpenCV) vehicle detection** for **drone systems**.
- Designed a **live display feed** integrating **detection results, GPS coordinates**, and **operational data** for **drone operators**.
- Applied **embedded systems knowledge** to optimize performance on **resource-constrained hardware** for **field deployment**.
- Contributed to developing **internal drone software tools**, combining **computer vision, data processing**, and **real-time visualization**.

Instructional Aide

Ann Arbor, MI

Michigan Department of Robotics

January 2025 – Present

- Assisted students in **designing and building robots**, providing guidance on **robotics, mechanical design**, and **systems integration**.
- Supported **lab sessions** by troubleshooting **technical challenges** and reinforcing key **course concepts**.
- Collaborated with the **instructor** to improve **course materials** and enhance **learning outcomes**.
- Mentored students to foster **hands-on problem-solving skills** and **teamwork** in **robotics projects**.

PROJECTS & OUTSIDE EXPERIENCE

Full Stack Freelancing

Mexico City, Mexico

Francisco Iglesias Salon and Spa

June 2025 - August 2025

- **Designed and deployed** an **AI-powered hair consultation system** with **full-stack development (frontend + backend)**.
- **Fine-tuned a custom LLM** to **assess hair damage** and **recommend personalized products/treatments**.
- Increased **product sales by 15%** and boosted **customer retention** with **individualized recommendations**.

University of Michigan Robotics Department

Ann Arbor, MI

Member

August 2025 - December 2025

- Designed and built the **“Wakey Wakey Robot”**, a system that tracks **eye movements** with **OpenCV** to detect student drowsiness.
- Applied **vector and linear mathematics** to implement real-time detection logic.
- Integrated **computer vision, robotics, and 3D printing** to create an interactive system that responded by spraying water when sleep was detected.
- Showcased skills in **hardware-software integration** and **applied AI for real-world problem solving**.

SKILLS & INTERESTS

Programming: C++ · Python · Go (Golang) · SQL

AI/ML: OpenCV · Custom LLMs · Machine Learning

Cloud & Databases: Firebase · AWS · Pinecone · OpenAI APIs

Hardware: Raspberry Pi · Embedded Systems

Interests: Camping, Movies (check out my TEDx Talk [here](#)), AI, and LLMs

Languages: English (native), Spanish (Native),
